

Restoration Guide Post 60k TR3A through TR3B

Category: Underhood

Example Shown: TCF TR3B

Component(s): Fuel Pump, Oil Filter Detail

Discussion:

At O5: AC brand embossed fuel pump with natural finish attached to mild steel fuel lines. Primer lever not shown. On right side of the pump is a P-clip mounted through the bolt that attaches the pump to the block. The clip holds the oil pressure line in place. Tip: If tab on diaphragm is stiff and brittle it's time to rebuild the pump!

At F6: Purolator "full-flow" oil filter head finished naturally.

At G6: Oil filter canister, color originally light blue but with age develops a teal green patina.

At E8: Another view of split-steering column, showing unfinished interior clamp and shaft.
